

Monkey Jam

Guide to stop motion animation

1. Open Monkey Jam and plug in your webcam. Click **New XPS**.

2. Click **Change**. You will create a new folder to save your work in.

3. Make a **new folder** in your computing folder.

4. Call the new folder 'StopMotion' and click OK.

5. Open the Capture window with this button.

6. This window will open

7. Pressing the 'Capture' Button will save the current image to the Layer.

Frame	Layer 1
1	Layer 1_0004.png
2	
3	Layer 1_0005.png

8. The layers are what make up your video.

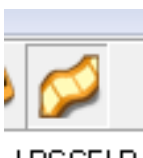

9. Right click a frame for more options. You can delete it here too.

10. You can extend a frame by dragging the corner down.

10	Layer 1_0006.png
11	

11. You can drag frames by left clicking and holding down.

12. Click the **preview** button to preview your video.

Use the '**Export**' video button to save your video.
