Parents

P3 - Chat to your child about who supports them at home. Are there members of the wider family network that your child uses to access support – think about adults they come into contact with on a regular basis such as Sports coaches, Scout Leaders etc.

P4 – Can you work through this page with your child and discuss each of the items in turn. If your child identifies it as a concern, are they able to explain why they are worried about it? Can you work together to identify ways that these concerns could be addressed?
